

Schedule Contracting

Schedule contracting can be a boon for business, allowing the government to buy your products and services more easily.

Our lawyers walk you through schedule contracts covering various categories of supplies and services. We present the best processes under schedule contracts with the General Services Administration (GSA) or Department of Veterans Affairs (VA).

We understand how you can best compete with other contractors within multiple award schedules.

We also address your potential liability and help you comply with the rules of the Price Reductions Clause, the Trade Agreements Act, among other compliance requirements.

We watch for risks so you can continue to sell to the Federal Government and/or plan for your next profitable contract.
