

## Sovereigns: Regulatory

We assist both sovereigns and the private sector to inform, comply with and challenge regulatory initiative all over the world.

Global regulation increasingly touches critical aspects of every major industry. We help sovereigns navigate the world's multiplying regulatory regimes as they cross industries and borders alike. We believe that regulation is neither a force to be feared nor an obstacle to be overcome. Regulation is simply a reality of doing business today, and the sovereigns that understand it holistically and navigate it well are the ones that will succeed.

Our team helps sovereigns understand, anticipate, and influence the shifting - and often volatile - regulatory landscape.

We also work with those partnering with sovereigns, ensuring alignment between the public and private sectors to drive continuous improvement and development.

### Representative experience

The Met Office on all aspects of its tender process in a "first of kind" procurement of a contract worth almost £1bn for "supercomputing as a service".

Uber in two successful appeals against TfL, securing its ability to continue operating in London.
