

Outsourcing

Strategic, long term, and complex.

Outsourcing creates new opportunities — focus, quality, and efficiency. It also creates new risks — costs, confusion, complexity.

We can help. Selection — RFPs, tender processes, and regulation. Standards — services levels, oversight, and reports. Responsibility — quality, liability, insurance. People — selection, training, cost. Rules — law, regulation, and standards. Expiry — transition, transfer, and costs.

Regular business, utility, or government. Financial institution, life sciences, or consumer goods. Manufacturing, IT, or service. Components or complete. Nearshoring or offshoring. First generation or second generation.
