

Insurance

Insurance is one of the most complex and highly regulated businesses in the financial world.

Structure, location, governance, capital, and selling requirements are all under the regulators' spotlight, meaning businesses in the insurance and reinsurance sector have to contend with a flurry of changes. Our decades of experience at the heart of the industry make us superbly placed to help you adapt to the shifting landscape and exploit the opportunities it brings.

From friendly societies, mutuals, participants at Lloyd's, and captive insurers through to the largest global insurance and reinsurance groups, we advise the whole market. This broad client base means there are very few issues we have not encountered and arms us with strong instincts for tackling any novel challenges when they do arise.

For complex problems we provide sophisticated and innovative solutions based on a thorough understanding of our clients' business and commercial needs. With more than 220 lawyers immersed in the insurance industry working across our offices in Europe, the United States, Latin America, and Asia, we offer a truly global perspective on the market.

Representative experience

Advised AXA on the distribution of an innovative product in 14 countries across Europe, Asia, Australia, and North and South America.
