

A global approach to IoT cybersecurity?

13 March 2019

The European Telecommunications Standards Institute (ETSI) has published a new [standard](#) for cybersecurity in relation to consumer IoT products. The standard builds on the UK's [Code of Practice for Consumer IoT Security](#), published in October last year. The Code of Practice was developed by the UK Government following publication of a draft code as part of the Secure by Design report published by the Government in March 2018 and after consultation with industry, consumer associations, and academics. The UK Code is voluntary but the UK Government was keen to work with ETSI to develop it into a global standard.
